Education

- From September 2021 to May 2025
Engineering Degree in Computer Science & Mathematics
ENSIIE, Graduate School of Engineering - Paris / Évry
 - JIN track: Video Games & Digital Interactions
- From September 2018 to June 2021
CPGE TSI (Technology & Industrial Sciences)
Lycée Saint Joseph Lasalle Lorient | Lycée Léonce Vieljeux La Rochelle
 - Preparatory Class for Engineering & Industrial Sciences

Experience

- Since December 2025
Engineer - Lead Gameplay Developer
Freelance ELEVATE CORE LLC
 - Development of a mobile game centered around pet care and arcade mechanics, featuring crypto wallet integration
 - Responsible for development, game design, gameplay balancing, and mobile performance optimization
- From August 2024 to February 2026
Engineer - Lead Gameplay Developer | Associate
Freelance Constellation Games
 - Development of a mobile RTS, first project of the Constellation Games studio
 - Full-lifecycle development: design, prototyping, implementation, optimization, and release. Agile methodology.
- From September 2024 to November 2024
Primary / Middle School Instructor
Fun Tech Adventures
 - Led Digital Discovery sessions introducing pupils to computing and video-game creation using Scratch
- From March 2024 to August 2024
Software Engineer | Development and optimization of a C# / JavaScript framework, Microsoft Power Platform consultant
End-of-Study Internship DIMSI
 - XrmFramework mission: Built and documented new features
 - BackROLL mission: Created projects, wrote tests, and added functionality
- From June 2023 to August 2023
Interactive VR Training Content Developer
2nd-year Internship Farsight VR Rennes
 - Polyvia mission: Built immersive VR training tools for plastics industry careers
 - Optima mission: Built a VR training course for the mediation profession
 - Cross-platform VR/XR development and performance optimization for mobile headsets
- From 2021 to 2023
Unity Developer - Game Jams
GameJam ENSIIE Évry
 - UniJam 2023: Alter Maze | GameJam Étiolles 2022: Archéollector | Global Game Jam 2022: Chrono Switch | UniJam 2021: From Scratch
- From June 2022 to July 2022
Unity VR Developer & Startup Creation
1st-year Internship C-19 Cluster (Games & Digital Interactions)
 - Co-founded a startup named Vulpecula VR with C-19 support

Skills & Interests

- Engines & Gameplay**
Unity (expert), C#, Gameplay Programming, Physics, Animation, UI/UX, Rapid Prototyping
- Platforms**
Mobile (iOS, Android), VR/XR, PC (Windows, macOS), Cross-platform
- Methodology**
Git, Agile/Scrum, Performance Optimization, Full Lifecycle Development
- Main languages**
C#, C++, C, Python
- Other languages**
SQL, Java, JavaScript, PHP, HTML/CSS, OCaml, Bash, R
- Frameworks & Tools**
Unity, Git, Arduino, Blender, React Native
- Soft skills**
Teamwork, stress management, perseverance, optimism, creativity, curiosity, self-confidence
- Personal Interests**
Science, technology, computer science, biology, history, mythologies
- Sport | Esport**
Gym, Hiking & nature walks | Super Smash Bros Ultimate
