

Letter of Recommendation

Bordeaux, June 25, 2026

Marin Enault

Full-Stack Developer

mar1.dev | @mar1dev

To whom it may concern,

It is my pleasure to wholeheartedly recommend **Louan Ourvouai**, with whom I had the opportunity to collaborate on the development of **PALZ**, an application built with Unity.

Louan demonstrated excellent technical skills throughout the project, particularly in the **design and development of mini-games**. His command of the Unity environment allowed him to deliver polished, engaging game experiences that integrated seamlessly into the overall application. He has a natural ability to turn ideas into functional and creative game mechanics efficiently.

One of his contributions that stood out most to our team was his ability to conduct **in-depth research and technical benchmarks**, which he consistently translated into **clear, well-structured presentations**. This skill for synthesizing complex information into accessible and actionable insights proved invaluable to the team, and directly shaped several key decisions throughout the project.

Beyond his technical abilities, Louan stands out for his **great attitude within the team**. His consistently upbeat demeanor helped maintain a positive working atmosphere, even during the most demanding phases of the project. His **outstanding punctuality** and strong sense of responsibility also made the collaboration remarkably smooth and reliable.

I recommend Louan without hesitation for any project requiring a motivated, thorough, and enjoyable Unity developer to work with. He would be a true asset to any team.

Please feel free to reach out if you need any further information.

Best regards,

Marin Enault
