★ Profile Summary

Engineering graduate from ENSIIE Paris (Évry-Courcouronnes), with a background in CPGE TSI (Technology & Industrial Sciences) preparatory studies covering electronics, automation, and signal processing. Four years of experience in C / C++ / C# development, performance optimization under constrained environments (mobile VR headsets, real-time applications), and cross-platform delivery. Comfortable with hardware prototyping (Arduino), connected devices (IoT), and systems architecture. Rigorous and methodical, used to working across the full lifecycle from prototyping to production.

A Languages

French Native

English C1 (Certified)

Portuguese B1

Norwegian A1 (currently learning)

🌐 International

Brazil, Goiânia (1 year)

Language stay

Canada, Québec (Chicoutimi, 5 months)

Exchange semester at UQAC

Ireland, Dublin (2 weeks)

EC English Language Centres

Germany, Berlin (1 week)

High-school trip (Lycée Saint Joseph La Salle, Lorient)

Education

From September 2021 to May 2025

Engineering Degree in Computer Science & Mathematics

ENSIIE, Graduate School of Engineering - Paris / Évry

- JIN track: Video Games & Digital Interactions
- Program delivered in partnership (dual-institution track) between ENSIIE and Télécom SudParis
- Build interactive applications in C / C++ / C#

From September 2018 to June 2021

CPGE TSI (Technology & Industrial Sciences)

Lycée Saint Joseph Lasalle Lorient | Lycée Léonce Vieljeux La Rochelle

- Preparatory class for engineering schools (Technology & Industrial Sciences)
- Study electronics, automation, signal processing and systems mechanics
- Design and analyze electromechanical systems through hands-on labs

Experience

From December 2025 to June 2026

Engineer - Lead Gameplay Developer

Freelance ELEVATE CORE LLC

- Build a mobile game in C# (Unity) with near real-time performance constraints
- Integrate a crypto wallet system and optimize resource usage

From August 2024 to February 2026

Engineer - Lead Gameplay Developer | Associate

Freelance Constellation Games

- Lead development of the studio's first mobile application, in C# / Unity
- Design the technical architecture and drive the project through to release
- Co-found the studio as an associate: technical decisions and project management

From September 2024 to November 2024

Primary / Middle School Instructor

Fun Tech Adventures

- Introduce pupils to computing and digital creation with Scratch

From March 2024 to August 2024

Software Engineer | C# / .NET Framework Development, Power Platform Consultant

End-of-Study Internship DIMSI

- Build and optimize a C# / .NET framework for Dynamics 365 / Power Platform

From June 2023 to August 2023

Interactive VR Training Content Developer

2nd-year Internship Farsight VR Rennes

- Build C# (Unity) tools for VR training courses
- Optimize rendering for mobile VR headsets: hardware resources and real-time constraints

From 2021 to 2023

Unity Developer - Game Jams

GameJam ENSIIE Évry

- Design technical prototypes in 48 hours, as a team (UniJam, GameJam Étiolles, Global Game Jam)

From June 2022 to July 2022

Unity VR Developer & Startup Creation

1st-year Internship C-19 Cluster (Games & Digital Interactions)

- Co-found Vulpecula VR around a hardware/software VR prototype

Personal Projects

Electronics prototyping with Arduino

Personal project

- Design electronic circuits with sensors and actuators
- Program microcontrollers for data acquisition and automation

Skills & Interests
