★ Profile Summary

Engineering graduate from ENSIIE Paris (Évry-Courcouronnes), specialized in Unity gameplay programming and C#. Four years of experience in mobile development, VR/XR and cross-platform delivery (Windows, macOS, iOS, Android), across genres including RTS, FPS, TPS, idle, 2D platformer, and serious games. Strong background in full-lifecycle development, rapid prototyping, performance optimization, and agile workflows. Also passionate about science and scientific communication.

A Languages

- French** Native
- English** C1 (Certified)
- Portuguese** B1
- Norwegian** A1 (currently learning)

🌐 International

- Brazil, Goiânia (1 year)**
Language stay
- Canada, Québec (Chicoutimi, 5 months)**
Exchange semester at UQAC
- Ireland, Dublin (2 weeks)**
EC English Language Centres
- Germany, Berlin (1 week)**
High-school trip (Lycée Saint Joseph La Salle, Lorient)

Education

- From September 2021 to May 2025
Engineering Degree in Computer Science & Mathematics
ENSIIE, Graduate School of Engineering - Paris / Évry
 - JIN track: Video Games & Digital Interactions
 - Program delivered in partnership (dual-institution track) between ENSIIE and Télécom SudParis
 - Build video games in Unity / C# through academic projects and Game Jams
- From September 2018 to June 2021
CPGE TSI (Technology & Industrial Sciences)
Lycée Saint Joseph Lasalle Lorient | Lycée Léonce Vieljeux La Rochelle
 - Preparatory class for engineering schools, focused on engineering sciences: physics, electronics, automation, mechanics
 - Develop scientific rigor and a structured way of working

Experience

- From December 2025 to June 2026
Engineer - Lead Gameplay Developer
Freelance ELEVATE CORE LLC
 - Build a mobile game blending pet care and arcade mechanics, in Unity / C#
 - Integrate a crypto wallet system into the game
 - Own game design, gameplay balancing and mobile performance optimization
- From August 2024 to February 2026
Engineer - Lead Gameplay Developer | Associate
Freelance Constellation Games
 - Lead development of the studio's first mobile game (an RTS in C# / Unity), from design to release
 - Design the technical architecture and game systems
 - Co-found the studio as an associate: technical decisions, project management and team coordination
- From September 2024 to November 2024
Primary / Middle School Instructor
Fun Tech Adventures
 - Introduce primary and middle-school pupils to computing and video-game creation with Scratch
- From March 2024 to August 2024
Software Engineer | C# / .NET Framework Development, Power Platform Consultant
End-of-Study Internship DIMSI
 - Build and optimize XrmFramework, a C# / .NET framework for Microsoft Dynamics 365 / Power Platform
 - Write unit tests and technical documentation
 - Work on the BackROLL project: new projects, tests and features
- From June 2023 to August 2023
Interactive VR Training Content Developer
2nd-year Internship Farsight VR Rennes
 - Build C# / Unity tools for VR training courses (plastics industry, mediation)
 - Optimize rendering and performance for mobile VR headsets, across platforms
- From 2021 to 2023
Unity Developer - Game Jams
GameJam ENSIIE Évry
 - Design and build game prototypes in 48 hours, as a team, across several Game Jams (UniJam, GameJam Étiolles, Global Game Jam)
- From June 2022 to July 2022
Unity VR Developer & Startup Creation
1st-year Internship C-19 Cluster (Games & Digital Interactions)
 - Co-found Vulpecula VR, a startup backed by the C-19 cluster

Personal Projects

- Garypto: automated cryptocurrency trading bot**
Personal project
 - Scan Binance markets in real time and spot opportunities with a custom multi-factor momentum strategy
 - Execute risk-managed trades from a live web dashboard

Skills & Interests

- Engines & Gameplay**
Unity 3D (expert), C#, Game Design, Gameplay Programming, Physics, Animation, UI/UX, Rapid Prototyping
- Platforms**
Mobile (iOS, Android), VR/XR, AR/VR, PC (Windows, macOS), Cross-platform
- Methodology**
Git, Agile/Scrum, DevOps, Full Lifecycle Development, Continuous Improvement, Technical Documentation
- Languages & Frameworks**
C#, C++, C, Python, SQL, Java, JavaScript, TypeScript, PHP, HTML/CSS, OCaml, Bash, R ; Unity, Arduino, Blender, React Native
- Soft skills**
Teamwork, stress management, perseverance, creativity, self-confidence
- Interests**
Science, technology, computer science, biology, history, mythologies ; Gym, hiking | Super Smash Bros Ultimate
